

DREAM LAYER 3

# THE TOURIST

**YOU:** Am I missing out on REX and Orientation because of this wacky dream?

**I.H.T.F.P.:** As I said, you're asleep on your flight to Boston. Brain function in the dream world is about 10 times normal. This effect is only compounded as you enter deeper levels.

**YOU:** Is that really how it works? So my 2-hour flight is like a week's worth of time at this level?

**I.H.T.F.P.:** Yes, once this plane lands, you'll have ample time to take a nice, orderly stroll down dorm row.
